

The netMCA-3 spectrometer

For HPGe and other detectors

- Highest resolution & throughput using TGI's DSP processing algorithms
- Autonomous internet host - no dedicated PC necessary
- No MCA specific software needed for access & control
- Various spectrum export/import formats (ASCII, Nucleus, IAEA-like)
- Spectra can be transferred in or out via ftp or read via http
- In built HDD provides practically unlimited space for archiving spectra
- Online support and assistance
- Battery pack & car adaptor available for in situ usage (6h battery operation)
